PROFESSIONAL SUMMARY

Full-Stack Software Engineer with a B.Sc. in Software Engineering from Babcock University (CGPA 3.96/5.0, Second Class Upper Honours) and 2+ year of hands-on experience building scalable web and mobile applications. Proficient in TypeScript, Node.js, React/Next.js and PostgreSQL. Demonstrated ability to ship production-ready features, optimize database performance, and integrate AI tooling to accelerate delivery. Seeking a full-stack or backend role where I can contribute technical depth and continue growing in a high-impact environment.

PROFESSIONAL EXPERIENCE

Software Engineer Intern • BillyRonks Global Ltd

Jul 2024 – present

Lagos, Nigeria (Hybrid)

- Built and shipped 25+ production-ready web applications using React.js, Next.js 14, and TypeScript; optimized asset delivery to achieve 40% faster page load times.
- Designed RESTful APIs and microservices with Node.js/Express.js, supporting 50+ concurrent users at 99.5% uptime with sub-200ms response times.
- Integrated AI-powered development tools (Claude AI, Cursor IDE, GitHub Copilot) into daily workflows, accelerating delivery velocity by an estimated 35%.
- Improved database performance across MySQL and MongoDB by introducing indexing strategies and query optimizations that cut execution time by 45%.
- Collaborated in Agile sprints using Git, Vercel CI/CD, and Jira, consistently delivering features ahead of schedule.
- Mentored 3 junior developers in code review standards, AI tooling, and DevOps practices, contributing to a 25% team productivity improvement.

KEY PROJECTS

AI-Powered Collaborative Whiteboard (Syntheboard) | Next.js, Node.js, Socket.IO, Prisma, PostgreSQL, Google Gemini

- Built a real-time whiteboard with an infinite canvas, live cursors, sticky notes, shapes, and in-board Jitsi video calls; deployed on Vercel (ai-powered-whiteboard-application.vercel.app).
- Integrated Google Gemini to generate flowcharts, brainstorm sticky notes, and data-to-charts from natural-language prompts; JWT auth with viewer/editor sharing.

Ticket Tracker - Issue Management System | C#, ASP.NET Core, EF Core, PostgreSQL, Next.js, TypeScript

- Engineered an ASP.NET Core REST API with EF Core and Neon PostgreSQL, JWT/BCrypt authentication, and strict per-user ticket scoping, covered by xUnit tests.
- Delivered a Next.js 16 frontend with Kanban and Grid views, live metrics dashboard, search, priority filters, and multi-option sorting.

AI-Powered E-Learning Platform (Final Year Project) / *Next.js, Node.js, PostgreSQL, Clerk, Google Gemini API*

- Built a personalized online learning platform with adaptive AI tutoring, real-time progress tracking, and certificate generation.
- Integrated Google Gemini API for intelligent course recommendations; platform serves 1,000+ monthly active users at 99.9% uptime on Vercel.

AfricqueHub — E-Commerce Platform / *React, Next.js, Node.js, MongoDB, Stripe*

- Delivered a full-stack e-commerce solution with product catalog, cart, Stripe payments, SSR for SEO, and internationalization support.
- Designed scalable REST APIs and MongoDB schema for products, orders, and customers.

Student Attendance & Analytics System / *Node.js, MySQL, JavaScript*

- Built a student management system adopted by 5+ educational institutions, with real-time grade tracking, attendance monitoring, and parent communication portal.
- Optimized MySQL queries and added caching, cutting report generation time by 60% for 500+ concurrent users.

V24U — Bill Payment & VTU Platform | *React, Next.js*

- Contributed to a multi-channel bill payment platform supporting electricity bill payments, airtime VTU, printable airtime PINs, TV subscriptions, and exam pins in a single interface.
- Collaborated on the responsive web experience using React and Next.js, extending platform access across web, mobile app, and a Telegram bot for instant, queue-free transactions.
